(FOR ADDRESS ONLY.)

The Nightingale (*Daulias luscinia*) is a member of the family *Turdidae*, famous for its beautiful song. The nest is loosely constructed of dead leaves, rushes and stalks of grass with a lining of fibrous roots, the bird laying from four to six eggs of a uniform, deep olive brown colour. The Wild Rose, of which there are several varieties in Great Britain, is a native of the Northern Hemisphere, the two most common varieties in Britain being the *R. spinosissima* and the *R. canina*.
